1) Complete the sentences:

Straight lines that never meet and stay the same distance apart are called $\qquad$ lines.

Straight lines which meet at a right angle are called $\qquad$ lines.

2) Write the number of pairs of parallel and perpendicular lines you can see in each shape.

Mark the right angles for the perpendicular lines.
pairs of parallel lines:
pairs of perpendicular
lines: ___

pairs of parallel lines: $\qquad$ pairs of perpendicular lines: $\qquad$

1) Robin wants to draw parallel lines.

Which points should he join up to create a pair of parallel lines? $\qquad$

He says, "If I draw a line from $A$ to $D$, and one from $B$ to $C$, the lines will be perpendicular to each other."
Is he correct? $\qquad$
Prove it on the picture!
2) Tick the correct statements:
$\square$ Line AC is parallel to line DF.Line $D E$ is perpendicular to line $E F$.Line $A B$ is perpendicular to line $A C$.Line $A B$ is parallel to line $E F$.
D
B A C F

1) This pentagon has no parallel lines. Can you explain, or show on the diagram, how you know?
$\qquad$
$\qquad$
$\qquad$
$\qquad$

2) Draw a picture of a house which has at least three pairs of parallel lines and three pairs of perpendicular lines.
