

Dear David Attenborough,

My name is Lucinda I live in Edenbridge and I go to school at Four Elms.

I am writing to you because so many animals have died and are dying because of pollution in the sea. Not many children know but we are trying our best to sort it by the sea vehicle collecting rubbish in the sea. But we need more ideas to collect and get rid of rubbish I don't have many ideas but these are mine:

- When scuba diving try and pick up litter that you see
- Make posters even on boats, so everywhere saying something like try to stop this with me
- Re use plastic or don't use plastic

I was hoping you would help me or give me some more ideas if you do or don't to help me. If you want to help, call my mums mobile that is [REDACTED] or my dad's that is [REDACTED] but it actually depends who I am with, but you could easily just write a letter to me your choice.

If you choose letter I live in

[REDACTED]

Edenbridge

[REDACTED]

Yours faithfully

Lucinda
