

PLAN

- 1) Draw a picture of a 'happy' beach and ocean and a 'sad' beach and ocean. And title them "Thank you for picking up your rubbish" and
eg. sad / happy fish or dolphins "Pick up your rubbish!"
eg. stick (collage) litter on beach
- 2) make a leaflet to raise awareness and post through neighbours letterbox.
 - on one side put your pictures of a 'happy' and 'sad' beach.
 - on the other side write facts from your mind map to raise awareness.
- 3) Post leaflets through neighbours letterboxes.

**A school project by Florence Rickard
(age 6), to raise awareness of
pollution in the ocean and suggest
strategies to others for reducing
pollution in the ocean. 05.02.21**

HOW DOES PLASTIC
HARM WILDLIFE
IN THE OCEAN?

WHAT CAN WE
DO TO STOP
PLASTIC GETTING
INTO THE SEA?

WHAT CAN WE
DO TO REDUCE
OUR PLASTIC
USE?

- Plastic takes hundreds of years to biodegrade.
- animals eat plastic and gets stuck in their stomach.
- half of all sea turtles have eaten plastic.
- Plastic gets caught on dolphins fins and they can't swim

- always put litter in the bin.
- always collect other people's litter on the beach.
- recycle and reuse plastic.
- when we go on a walk take a bag with us to pick up other people's litter.

- use re-usable water bottles and bags.
- don't use single plastic.
- use alternative materials to plastic, such as bamboo toothbrushes.
