1. Find $\frac{1}{2}$ of the gingerbread biscuits.

$\frac{1}{2}$ of ( ) = ( )

5. Find $\frac{1}{4}$ of the mince pies.
$\frac{1}{4}$ of ( ) = ( )

2. Find $\frac{1}{3}$ of the candy canes.

$\frac{1}{3}$ of ( ) = ( )

6. Find $\frac{2}{4}$ of the peladillas.

$\frac{2}{4}$ of ( ) = ( )

3. Find $\frac{3}{4}$ of the tangerines.

$\frac{3}{4}$ of ( ) = ( )

7.

$\frac{1}{2}$ of ( ) = ( )

$\frac{2}{4}$ of ( ) = ( )

4. Orla has put $\frac{1}{2}$ of the cookies on to a plate. Draw the other half.

How many cookies are there in total? ( )
8. $\frac{1}{4}$ of the crackers have been used.
How many crackers were there to begin with? ( )

Find 3/4 of these sets of objects:

Find Three Quarters

Here are Anna's sweets. She wants to give $\frac{3}{4}$ of them to her friends. Here is her working out:

$\frac{3}{4}$ of my sweets makes 12, so I will give 12 sweets to my friends.

Can you spot Anna's mistake? Why has she made this mistake?

Show how she could find $\frac{3}{4}$ of her sweets.
