Year 1 Maths Multiplication Outcome Problems

I forgot that we will need decorations and things to eat our food off of like plates! I need your help to solve the problems to find out how many of each item I might need to buy.

If bought 5 packets of balloons and there are 5 balloons in a packet. How many would I buy altogether?

If bought 2 packets of balloons and there are 10 balloons in a packet. How many would I buy altogether?

If bought 3 packets of plates and there are 10 plates in a packet. How many would I buy altogether?

If bought 8 packets of plates and there are 2 plates in a packet. How many would I buy altogether?

If bought 10 packets of cups and there are 5 cups in a packet. How many would I buy altogether?

If bought 6 packets of cups and there are 2 cups in a packet. How many would I buy altogether?

If bought 4 packets of straws and there are 10 straws in a packet. How many would I buy altogether?

If bought 8 packets of straws and there are 5 straws in a packet. How many would I buy altogether?

If bought 4 packets of napkins and there are 5 napkins in a packet. How many would I buy altogether?

If bought 6 packets of napkins and there are 5 napkins in a packet. How many would I buy altogether?
