

Complete the table:

Decimal	Fraction in tenths or hundredths	Simplified fraction
0.6	$\frac{6}{10}$	$\frac{3}{5}$
	$\frac{3}{10}$	$\frac{3}{10}$
0.25	$\frac{1}{4}$ then $\frac{5}{20}$ then $\frac{25}{100}$	
	$\frac{5}{10}$	$\frac{1}{2}$
0.95	$\frac{95}{100}$	$\frac{19}{20}$

6) Three friends share a pizza. Oscar ate 0.25 of the pizza, Ellis ate 0.3 of the pizza and Seb ate 0.35 of the pizza.

6a) Oscar $\frac{25}{100}$ Ellis $\frac{30}{100}$ Seb $\frac{35}{100}$

6b) $\frac{25}{100} + \frac{30}{100} + \frac{35}{100} = \frac{90}{100} = \frac{9}{10}$ eaten. So $\frac{10}{10} - \frac{9}{10} = \frac{1}{10}$
