

Wednesday 29th /Thursday 30th April

I can describe sharing as giving out fairly

I know sharing means to give things out equally and fairly

I can solve number stories involving halving and sharing

Activity ideas...

Sharing means giving things out
into equal groups

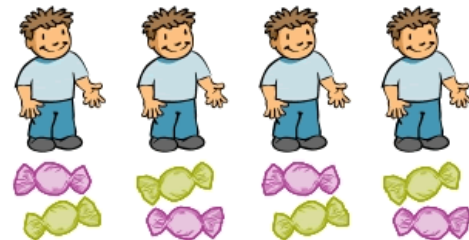

Sharing is fair

When you share things there must
be the same in each group

Can you solve the number stories, on the
next slide, by sharing. Remember to make
sure everyone has the **same** amount!

I shared 8 sweets between my four
friends. How many sweets did each friend
get?

Key vocabulary

sharing

equal

same

I shared 8 sweets between my four friends. How many sweets did each friend get?

Mouse took a stroll in the deep dark woods and found 4 nuts. He shared them with fox.
How many nuts did they each get?

The Gruffalo had 10 cakes. He shared them with snake. How many did they each have?

Owl collected 12 twigs for her nest. She shared them with fox and mouse. How many twigs did they each have?
